Name: Lily Free '20

Accomplishments:
This past the summer, Lily Free '20 was selected to attend a week-long program through the National Youth Leadership Forum: National Security through the Envision Experience in Washington, D.C.

"I was fortunate enough to be able to go the Floor of the House of Representatives and hear from two Congressmen. I attended the State of the Union where a foreign officer spoke about his work with refugees in other countries. We received a tour of the FBI and walked through the public exhibit. I toured the Pentagon and visited the 9/11 Memorial which was extremely sad yet very eye-opening. All of the site-visits allowed me to see different government career options," voiced Lily.

"The most memorable part of the forum was the group simulation, where we acted as the government. We were given a set budget and had to solve different problems that were given every 30 minutes. I was the Speaker of the House and my group was running from room to room trying to solve these problems. It was one of my favorite experiences and helped me have a better appreciation for our government and everything they deal with on a daily basis," shared Lily.

Activities & Interests:
Lily is an Academy Ambassador, a member of the Dance Team, French Club, Latin Club, Ultimate Fan Club, Free to Smile and Voices for Change.

Health Sciences Honors Program Students Gain Invaluable Experience at MetroHealth
This week, the Health Sciences Honors Program took a field trip to MetroHealth. Students interacted with 1 of 13 Virtual Reality surgical training devices in the world, which were developed by a
Students also participated in training simulations similar to what MetroHealth professionals would experience in their careers at MetroHealth. The group participated in learning about the following: CPR and airway (instructions and hands on practice of intubation tubes), Hemorrhage (how to “pack” a wound or control bleeding till help arrives), Project DAWN (explaining what Narcan is and how or why we use it), Ultrasound and Metro Life Flight.

Students were also able to work with a one-of-a-kind mobile unit with the same purpose. With the hands-on experience, students were able to take ultrasounds of their heart as well as play some “training” games for ultrasound devices.

“"My favorite part of the field trip was the speaker on the opioid crisis and addiction in America. I have plans to become a neuroscientist and wish to help de-stigmatize mental health and illnesses. The discussion was full of pointers that will help me achieve this goal, and I am interested in learning how addiction affects the brain," shared Abigail Krempa ’20.
